

## Kenwood's Updated GPS/AVL & Dispatch Software KAS-10 version 3.0

Kenwood is announcing an update to the existing GPS/AVL & Dispatch Software KAS-10.

The KAS-10 dispatch messaging and GPS/AVL software package has been enhanced to now include Virtual Radio IP Dispatch\*<sup>1</sup> allowing the dispatch PC to connect directly into a NEXEDGE® trunked network (no control station radio required), and Google Earth\*<sup>2,3</sup> Compatible allowing the mapping areas expand on the whole globe.

\*1. Virtual Radio IP Dispatch features require updated NXR-x00 repeater firmware (VER 2.5 or later) and updated KPG-110SM System Manager (V2.5 or later).

\*2. KAS-10 will not include the Google Earth, and both software operates independently.

\*3. Google Earth Pro License must be purchased by the end-user on business or commercial use.

Orders are being accepted with initial shipments scheduled **from now**.

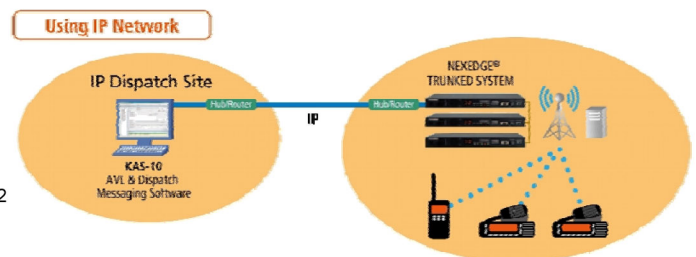

### Main Enhancements

- AVL & Dispatch Operation Over IP
- Google Earth Compatible
- 100 Group Scan with 4 Priority Monitor ID's
- External PC Mic & Speaker\*<sup>1</sup>
- DVSI USB-3000™ AMBE +2@ VOCODER\*<sup>1,2</sup>

\*<sup>1</sup> Required for VOIP dispatch purchase separately

\*<sup>2</sup> Supplied by Digital Voice Systems, Inc

☆ **The DVSI Vocoder can be ordered from your KENWOOD dealer as Kenwood model name "KSGCP50001".**

### Benefits

KAS-10 Version 3.0 software can send/receive messaging, track fleet radios and voice dispatch over an entire NEXEDGE® trunked system via IP connectivity, and enables to use the AVL capability for the areas which are not covered by Microsoft MapPoint.

The product is in step with Kenwood's "green" ecological initiative of environmental responsibility. This includes the control of 25 anti-green substances under our management program.

For more details, please ask your Kenwood contacts.
